

# Online Documentation

This document provides hyperlinked bookmarks that open selected StarTeam manuals. To open one of the manuals, click on its title in the Bookmarks tab of the left pane. To return to this document, click on the Window menu and click on the alldocs.pdf entry.

Depending upon which StarTeam products you purchased and installed, some of the applications described in these manuals may not be on your system.

- The **StarTeam New Features Guide** describes the new features in this release of the StarTeam product line.
- The **StarTeam Installation Guide** provides detailed instructions for installing the “core” StarTeam products and lists the minimum system requirements for each of those products.
- The **StarTeam Getting Started Guide** presents two tutorials on version control and configuration management for the StarTeam Server and client. The tutorial for administrators explains how to perform basic administrative functions in both the server and the client, while the tutorial for users explains how to use basic features in the StarTeam client.
- The **StarTeam User’s Guide** explains how to use the StarTeam client to perform version control and configuration management functions, such as tracking and managing changes to files, sharing files and comments with other team members, and accessing previous versions of a file. It also explains how to use other items, such as change requests, requirements, tasks, and topics.
- The **StarTeam Administrator’s Guide** explains how to configure and maintain the StarTeam Server; create and maintain StarTeam projects, views, and folders; and manage user access.
- The **StarTeam Extensions User’s Guide** explains how to design and manage StarTeam Extensions, such as alternate property editors. It also covers the StarTeam Workflow Designer and the StarTeam Notification Agent.
- The **StarTeamMPX Administrator’s Guide** describes the basic operation and architecture of a StarTeamMPX system and explains how to install and configure the StarTeamMPX components.
- The **StarDisk User’s Guide** explains how to install and use StarDisk, which enables you to use Windows Explorer as a simple client for StarTeam Servers.

**Borland®**
